Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Request for Continued Examination (RCE)

The request filed on August 18, 2004 for a RCE is acceptable and an RCE has been established. An action follows.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-54 and 56-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyce (5,899,939) in view of Boyd (6,206,923).

Boyce discloses the invention substantially as claimed and a body having a substantially tubular inner member and at least one substantially tubular outer member (fig.1-2 and col.6, lines 8-19—further discloses that the device may be formed in any shape); however, Boyce does not disclose each member being formed from a different region in the body or use of cancellous and cortical bone. Boyd teaches a flexible

implant using partially demineralized bone comprising a ring-shaped member (fig.9 and col.6, lines 10-20) and the use of both cancellous and cortical bone (col.7, lines 1-14). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate each member being formed from a different region in the body and cancellous and cortical bone, as alternative sources of bone that may be used for the device depending on where the implant is needed and ring-shaped members as alternative shapes that may the device may be molded into.

Response to Arguments

Applicant's arguments with respect to claims 1-55 and 56-78 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lalita M Hamilton whose telephone number is (703) 306-5715. The examiner can normally be reached on Tuesday-Thursday (8:30-4:30).
